

ARCOM has Created a Customized Specification Section – 061600

ATLANTA (April 25, 2017) – Georgia-Pacific is proud to announce that ARCOM, the leader in specifications, has created a customized specification section – 061600 Air and Water Resistive Sheathing Board – to accurately specify Georgia-Pacific’s unique DensElement™ Barrier System. Now architects, engineers and design professionals can specify Georgia-Pacific’s innovative system with the precision they’ve always relied upon in ARCOM’s software platforms. The creation of the customized section confirms the DensElement™ Barrier System is a viable consideration for any building project.

ARCOM and Georgia-Pacific worked together to create the specification, ensuring proper and exact details. “Our partnership with ARCOM continues to benefit specifiers who are looking for progressive products to solve their building challenges. Instead of forcing our innovative DensElement™ Barrier System into sections designed for traditional products, ARCOM worked with us to create a section appropriate to this new system we’ve developed,” said Brent Paugh, president for Georgia-Pacific Gypsum.

ARCOM and Georgia-Pacific are committed to helping all design professionals more easily and accurately select and specify products for their projects. In addition to the new customized section 061656 Air and Water Resistive Sheathing Board, Georgia-Pacific’s product catalog and data sheets are also easily accessible to specifiers.

About Georgia-Pacific

Headquartered at Atlanta, Georgia-Pacific is one of the world’s leading manufacturers and marketers of building products, tissue, packaging, paper, cellulose and related chemicals. The company employs nearly 35,000 people worldwide. Georgia-Pacific Gypsum pioneered fiberglass mat gypsum technology in 1986 and, for three decades, inspired fundamental changes in the types of gypsum panels specified for walls and roofing in commercial building assemblies. Dens® brand interior and exterior products are the #1 architecturally-specified fiberglass mat gypsum panels. For more information about Georgia-Pacific building products visit www.buildgp.com.

About ARCOM

ARCOM, the specification experts, exclusively publishes MasterSpec™, a product of the American Institute of Architects (AIA), reaching over 60,000 design professionals involved in building projects. ARCOM owns and publishes SpecText™ for use by engineers for infrastructure projects, including water and wastewater utilities and equipment. ARCOM also owns e-SPECS, BIM to Specifications ARCOM provides extensive product and manufacturer information through cloud-based specification resources, custom manufacturer specifications, and the SpecBuilder Expert platform. ARCOM's innovative software specification tools and resources dramatically simplify specification creation, research, and project management. Follow ARCOM on Facebook, Twitter, and LinkedIn.
